

**Daniel Henry**  
**Senior Vice President, Global CIO**  
**McDonald's Corporation**

Daniel Henry is Senior Vice President and Global CIO for McDonald's Corporation. Daniel is responsible for the global technology portfolio at McDonald's, ranging from our restaurant and digital technologies to the infrastructure and technology platforms that support our business. He also has oversight over the Global Technology PMO and Information Security. His role includes management of our strategic providers, which will bring more innovative restaurant and digital technology to the system at an even faster pace.

He works alongside McDonald's senior leadership and our markets to ensure alignment on the support of the Velocity Growth plan and how it is brought to life in our restaurants through technology.

Daniel has more than 20 years of experience in large scale product development/management, ecommerce, application development, architecture, infrastructure and operations. He comes to McDonald's from American Airlines, where he was responsible for all airport and customer-facing technologies for the airline, from its check-in systems to its mobile app and kiosks. He was also responsible for American's loyalty platform and for enterprise data, working alongside partners across the organization in operations, marketing and beyond.
