

Hi Professor (last name),

My name is (student name) and I am a junior management major at TCU. I am passionate about organizational psychology and plan to continue my education after graduation by completing a masters or potentially a PhD in this field. I am also excited about the potential of engaging in research throughout my next two years in Neeley. While looking through TCU's management faculty page, I saw that you specialize in employee engagement and job attitudes over time which are areas I hope to study over the next several years. As of now, I am interested in employee well-being and engagement within organizations. Next semester, I will be interning with a consulting firm to help organizations become more aware and concerned with employee well-being!

I also saw that you are a part of SIOP and have won several awards at their annual conference. Next week, I will be attending their virtual conference and I am excited to learn more, make connections, and to get more involved with SIOP.

I would be interested to learn more about your research. I am not sure if you have positions for students to help with your research, but if you do, I would love to learn more. Also, if there are any ways I can get involved in similar research, I would also be happy to learn more about that possibility! I am enrolled in your organizational analysis and problem-solving course for next semester, so I will be meeting you soon! Thank you for your time and let me know if there are any opportunities for me to take advantage of!

Best,
Student Name
